

IMPLEMENTATION OF THE PROJECT

Since June "full steam ahead" started free research carried out under the program financed with so-called. "Funds Norwegian"

To date we made already:

- | More than 120 cytology;
- | 300 girls were vaccinated with the first dose of the HPV vaccine;
- | performed over 80 studies of PSA and free PSA for men;
- | 150 occult blood tests;
- | 250 gynecological ultrasound.

Very much interest remaining tests, for which registration will begin in August.

The investment part of the project signed an agreement to acquire the scanner to the camera for a mammogram, so soon it will be possible also to perform mammography in the project.

Even in July will be announced tender for purchase dermatoscope and endoscopic test kids.
